

Technip awarded a gas-to-liquids contract in Uzbekistan

Technip was awarded by Uzbekistan GTL LLC⁽¹⁾ an extension of the existing reimbursable services contract, for the front-end engineering design of a gas-to-liquids⁽²⁾ (GTL) plant, located 40 kilometers south of Qarshi in Uzbekistan.

This plant will be based on Sasol's world leading GTL technology and will have a capacity of 1.4 million metric tons per year, a similar capacity of the Oryx GTL facility in Qatar implemented by Technip, with following product slate: GTL diesel, kerosene, naphtha and liquid petroleum gas.

This award follows the successful execution by Technip of the first phase contract related to the detailed feasibility study. The front-end engineering activities will be executed by Technip's operating center in Rome, Italy, with the support of the Group's center in Kuala Lumpur, Malaysia.

⁽¹⁾ Uzbekistan GTL LLC is a JV company incorporated in Uzbekistan with three shareholders: Uzbekneftegas (Uzbekistan state owned oil and gas company), Sasol Synfuels International (Sasol Group South Africa) and Petronas (a company fully owned by the Malaysian government).

⁽²⁾ Gas to liquids (GTL): transformation of natural gas into liquid fuels (Fischer Tropsch technology).

Technip is a world leader in project management, engineering and construction for the energy industry.

From the deepest Subsea oil & gas developments to the largest and most complex Offshore and Onshore infrastructures, our 26,500 people are constantly offering the best solutions and most innovative technologies to meet the world's energy challenges.

Present in 48 countries, Technip has state-of-the-art industrial assets on all continents and operates a fleet of specialized vessels for pipeline installation and subsea construction.

Technip shares are listed on the NYSE Euronext Paris exchange and the USA over-the-counter (OTC) market as an American Depositary Receipt (ADR: TKPPK).
