Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2013.

Section 1 – Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

FMC Technologies, Inc. (the “Company,” “FMC Technologies,” “we,” “us,” and “our”) evaluated its product lines and determined that certain products that we manufacture or contract to manufacture contain tin, tungsten, tantalum, and/or gold necessary to the functionality or production of such product(s).

A copy of this Form SD and the Conflict Minerals Report filed as Exhibit 1.02 hereto are publicly available on the Company’s Internet web site at www.fmctechnologies.com/AboutUs/HSEStandards.

Item 1.02 Exhibit

Our Conflict Minerals Report is filed as Exhibit 1.02 hereto.

Section 2 – Exhibits

Item 2.01 Exhibits

<u>Exhibit No.</u>	<u>Description of Exhibit</u>
1.02	Conflict Minerals Report as required by Items 1.01 and 1.02 of Form SD.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

FMC TECHNOLOGIES, INC.
(Registrant)

By: /s/ Jeffrey W. Carr

Date: June 2, 2014

Name: Jeffrey W. Carr

Title: Senior Vice President, General Counsel and Secretary

EXHIBIT INDEX

<u>Exhibit No.</u>	<u>Description of Exhibit</u>
1.02	Conflict Minerals Report as required by Items 1.01 and 1.02 of Form SD.

FMC Technologies, Inc.
Conflict Minerals Report
for the Year Ended December 31, 2013

1. Introduction

This Conflict Minerals Report describes FMC Technologies, Inc.'s (the "Company," "FMC Technologies," "we," "us," and "our") due diligence process in accordance with the requirements of Rule 13p-1 of the Securities Exchange Act of 1934, as amended.

2. Company Overview

We are a global provider of technology solutions for the energy industry. FMC Technologies, Inc. was incorporated in November 2000 under Delaware law and was a wholly-owned subsidiary of FMC Corporation until our initial public offering in June 2001. Our principal executive offices are located at 5875 North Sam Houston Parkway West, Houston, Texas 77086.

We design, manufacture and service technologically sophisticated systems and products, including subsea production and processing systems, surface wellhead production systems, high pressure fluid control equipment, measurement solutions and marine loading systems for the energy industry. We report our results of operations in the following reporting segments: Subsea Technologies, Surface Technologies and Energy Infrastructure. We evaluated our product lines and determined that certain products that we manufacture or contract to manufacture contain tin, tungsten, tantalum, and/or gold ("3TG") necessary to the functionality or production of such product(s).

3. Reasonable Country of Origin Inquiry and Due Diligence

Reasonable Country of Origin Inquiry

To implement the reasonable country of origin ("RCOI") inquiry, our supply base collected information regarding the presence and sourcing of 3TG used in the products supplied to FMC Technologies. Information was collected and stored using an online platform provided by a third party vendor, Source Intelligence.

Supplier engagement included these steps:

- We sent communications to our suppliers describing the conflict minerals compliance requirements and requested completion of a conflict minerals questionnaire;
- Our suppliers were requested to respond to our questionnaire, which is based off the Electronic Industry Citizenship Coalition and Global e-Sustainability Initiative ("EICC GeSI") Conflict Minerals Due Diligence Template, to identify the 3TG smelters and refiners from which they source their materials, including the associated countries of origin; and
- When necessary, reminder emails were sent to non-responsive suppliers requesting completion of our questionnaire.

Based on our RCOI inquiry, we believe that certain of our products may contain 3TG that originated in the Democratic Republic of the Congo or an adjoining country and are not from recycled or scrap sources. As such, we then proceeded to exercise due diligence on the source and chain of custody of such 3TG.

Due Diligence

Our due diligence process is based on the Organisation for Economic Co-operation and Development's Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas and accompanying supplements (the "OECD Framework"), which is an internationally recognized due diligence framework. All steps taken by us in preparing this Conflict Minerals Report were in accordance with the OECD Framework. A copy of our Form SD, this Conflict Minerals Report and our Conflict Minerals Policy are publicly available on our Internet web site at www.fmctechnologies.com/AboutUs/HSEStandards.

For the year ended December 31, 2013, our due diligence efforts included the following:

- Adopted a conflict minerals policy available at www.fmctechnologies.com/AboutUs/HSEStandards;
- Assembled an internal, cross-functional team to support supply chain due diligence;
- Reviewed and maintained our strategy to respond to supply chain risks;
- Implemented internal measures to strengthen Company engagement with suppliers;
- Engaged the services of a third-party, Source Intelligence, to contact the identified suppliers via email and telephone and manage responses;
- Requested suppliers to confirm the presence of 3TG in their products;
- Requested documentation from suppliers supporting their responses to our Conflict Minerals Questionnaire;
- Evaluated supplier responses for plausibility and consistency;
- Used government websites and smelters' or refiners' databases to verify companies identified;
- Established a process to identify the smelters or refiners in the supply chain;
- Reported risk management findings to senior management; and
- Reported annually on supply chain due diligence.

4. Product Description

We manufacture and contract to manufacture certain products that contain 3TG, such as subsea production and processing systems, surface wellhead production systems, high pressure fluid control equipment, measurement solutions, marine loading systems, remotely operating vehicle systems, manipulator systems, subsea control systems, fracturing flowback services and wireline services for the energy industry.

Suppliers were requested to use the EICC-GeSI Template to identify 3TG smelters and refiners and the associated countries of origin. Below is a list of verified smelters:

Smelter or Refiner / Facility Name	Conflict-Free Status
<i>Tin</i>	
CNMC (Guangxi) PGMA Co. Ltd.	Unknown

Countries of origin for the smelters and refiners include: Argentina, Australia, Austria, Bolivia, Brazil, Burundi, Canada, Chile, China, DRC - Congo (Kinshasa), Ethiopia, Ghana, Guinea, Indonesia, Japan, Kazakhstan, Kyrgyzstan, Laos, Malaysia, Mali, Mexico, Mongolia, Mozambique, Namibia, Nigeria, Papua New Guinea, Peru, Philippines, Portugal, Russia, Rwanda, South Africa, South Korea, Spain, Taiwan, Tajikistan, Tanzania, Thailand, United Kingdom, United States, Uzbekistan and Zambia.

5. Steps to Improve Due Diligence

In moving to improve our due diligence and further mitigate the risk of benefiting armed groups, we have taken (since January 1, 2014), or will take, the following steps:

- Continue to assess the presence of 3TG in our supply chain;
- Establish clear requirements with suppliers regarding performance and sourcing in compliance with all regulatory requirements;
- Increase the response rate for our RCOI process; and
- Continue to compare the RCOI results to information collected via independent conflict-free smelter validation programs.
