

FMC Technologies Measurement Solutions Wins “Supplier of the Year” Award

Chevron’s annual Regional Procurement Conference was held earlier this year for the region of Africa and Pakistan. FMC Technologies was invited to participate in this event as a valued business partner and key supplier to Chevron. The Conference was held in Cape Town, South Africa. Howard Short, General Manager Eastern Hemisphere, and Debbie Drews, Aftermarket Business Manager (former Account Manager to Chevron) attended on behalf of FMC Technologies.

During this event an awards ceremony was held to honor those suppliers that have given superior service and who have offered best practices to help strengthen the partnerships with Chevron. FMC was nominated by Chevron’s Fabian Magerman, Sarath Ravipati and Wayne Klahs and we are pleased to announce that FMC Technologies was awarded the Supplier of the Year 2008 for being “Most Admired for its Delivery on Operational Excellence”. This recognition was based on our “valued contribution to the safe, responsible and reliable delivery of goods and services to Chevron Global Downstream Africa Pakistan”.

Bob Potter, Senior Vice President, said “this is an outstanding accomplishment. Congratulations to the entire organization for making this happen”.

This award is a great example of what we can achieve when we work together as a team to reach for a higher standard in all that we do. Our efforts are noticed and remind us of our potential every day.

Like a word can change the meaning of a sentence or a sentence the outcome of a story, your insight, knowledge and expertise can determine the outcome of our journey together.

Howard Short and Debbie Drews accepting the award from Chevron’s Sarath Ravipati and Wayne Klahs.
