

Rethink. Reinvent. Reimagine.SM

We're driving step-change improvements to reduce costs and improve operators' returns. See how we are Rethinking, Reinventing and Reimagining the way we do business...

SUBSEA FIELD DEVELOPMENT COST REDUCTION UP TO 30%
Optimized field design + Equipment savings + Installation savings + Field operation savings =

Integrated business models

BETTER
field economics

FMC Technologies and Technip Alliance forms

FORSYS SUBSEA

Simplified field design

INTEGRATED SUBSEA
production & processing systems, umbilicals, risers & flowlines

LIFE OF FIELD MONITORING & SERVICES MAXIMIZE PERFORMANCE

Standardization of equipment and processes

LESS
Project management hours

LESS
Engineering hours

MAX
Standardization maximizes efficiency

30-50% FASTER
equipment delivery

95%
reduction in documentation

ONE
HP/HT standard for five operators functioning up to **20,000** PSI and **350** Degrees Fahrenheit

Innovative technologies

SIMPLER
product designs fewer parts and easier manufacturing

SMALLER EQUIPMENT
means less installation time and cost

SHAPE MEMORY
alloy subsea fittings replace welded connections. Installed in **30 SECONDS**

INLINE ElectroCoalescer
saves energy and time in oil/water separation

"In designing our new generations of subsea equipment, lots of innovative possibilities open up. We're only limited by our imagination."
Brad Beitler, Vice President, Technology
